WELCOME

WELCOME

Welcome to Ware Dental. An independent, state of the art dental clinic based in Hertfordshire. At Ware Dental we offer exceptional care and service to all our patients without compromise. Our caring and professional staff will take care of all your treatment needs and ensure that your visit to our practice is as pleasant and comfortable as possible.

The clinical team at Ware Dental Practice are trained to the highest standards, following the strictest guidelines of good practice and cross infection to ensure the health and wellbeing of patients in our care at all times.

Our highly trained Dental Surgeons are registered by the General Dental Council of Great Britain and Hertfordshire Primary Care Trust. The practice is registered by the Care Quality Commission and has achieved the British Dental Association 'Good Practice' award every year since 2009.

All team members are DBS checked and we have policies in place to protect children and vulnerable adults within our care.

We value the views and opinions of our patients, we listen and learn from experience and we promise to provide the best service possible in an environment that is friendly and welcoming.

Dr Simon Oldham

B.D.S. (Birm.) PG Cert. Den. Ed. PG Cert. Implantology PG Cert. Cosmetic Dent

PRACTICE PRINCIPAL

Simon graduated from The University of Birmingham in 1999. He worked as a dental associate in central London and Hertfordshire for many years and in 2007 became principal of Ware Dental Practice.

Once taking over, he sympathetically restored the building to create a beautiful state-of-the-art practice, ensuring that none of the original character was lost.

Simon is dedicated to providing an outstanding level of dental care for his patients and has worked hard to put together a team who share his beliefs. He is passionate about his patients smiles, and enjoys being able to carry out extensive restorative procedures on his patients with the use of implants, crowns, veneers and invisible orthodontics

Simon is committed to his ongoing professional development; he is a full member of the British Academy of Cosmetic Dentistry and the International Team for Implantology. He completed his Post

Graduate Certificate in Implantology at the Eastman Dental Institute and has been awarded a position at the Royal College of Surgeons to complete his Diploma in advanced dental implantology.

Simon has Post Graduate Certificates in both Dental Education and Cosmetic Dentistry. He has been an accredited trainer for the Eastern Deanery Foundation Training Scheme for over 10 years. In this role he lectures dentists on the importance of correct treatment planning in cosmetic dentistry and smile makeovers.

Simon has extensive knowledge of the management of snoring and sleep apnoea and is a recognised practitioner for the provision of Somnowell Mandibular Advancement Devices used to treat these issues effectively.

Simon has a wonderful relationship with his patients and his team and is highly respected throughout Hertfordshire for the beautiful smiles that he has created.

We are Ware Dental

I have been a patient at Ware Dental Practice for six months and I cannot stress enough what a wonderful, caring and attentive practice they are. They go above and beyond the normal level of service expected in a dental practice. The whole team are friendly and approachable and I have recommended them to many of my friends.

- Creating beautifully natural smiles.
- An independent dental practice based in the picturesque town of Ware, Hertfordshire.
- We are an experienced and dedicated team committed to our patients.
- We will always listen to you.
- We use a multi team approach to ensure that you are always seeing the right person for your dental needs.
- We have been accredited with the BDA Good Practice Scheme every year since 2009.
- We are constantly investing in the practice to ensure that our equipment and materials are of the highest standards.
- All our team members have made an ongoing commitment to their dental education and regularly attend courses to continue to expand their knowledge.
- We believe in giving patients choices and knowledge.

Our Treatments & Services

GENERAL

COSMETIC

ORTHODONTIC

DENTAL IMPLANTS

HIGH QUALITY DENTISTRY

Our main aim is to ensure that you can smile with confidence. Our treatments are tailored to your dental needs to get the very best from your smile.

Some of the key treatments we provide are:

- Cosmetic Dentistry
- Implants
- Invisible Braces
- Restorative Dentistry
- Hygiene Clinic
- General Dentistry
- Smile Makeovers
- Skin Rejuvenation
- Somnowell Advanced Anti Snoring Devices

HYGIENE CLINICS

Good oral hygiene is always important and regular hygiene visits will not only keep your smile looking great they will help maintain the health of your teeth and gums.

Plaque build up around your teeth can cause unpleasant smells, staining and bleeding of the gums. If you have restorations such as crowns, veneers, fillings, dentures or implants it is extremely important to see a dental hygienist on a regular basis.

Regular professional maintenance will help you keep your teeth free of decay and looking great. Our hygiene team are friendly, caring and above all gentle. They will help you understand which areas of your mouth are hard to reach and show you how to maintain these areas easily.

If your dentist has already diagnosed gum disease or gum inflammation (gingivitis) they will tell you and arrange an appointment with our hygiene team. Your Dental Hygienist will follow a treatment plan designed specifically for you to treat your condition appropriately with the most up to date techniques available today.

DENTAL IMPLANTS

A dental implant is a titanium screw that is used as a substitute for a missing tooth root. The implant is placed into the jaw bone beneath the gums. Once in place the implant can be used as a support to replace missing teeth.

Implants can be used to replace a single tooth or multiple missing teeth. They can also be used very effectively to stabilise loose dentures.

The benefits of implants are that they are permanently fixed in your mouth and do not need to be removed for cleaning. They allow you to chew your food with the same confidence as natural teeth and, if cared for correctly can last a lifetime.

At Ware Dental we only use the most advanced materials and implant systems to ensure your treatment is as predictable and reliable as possible.

INVISALIGN

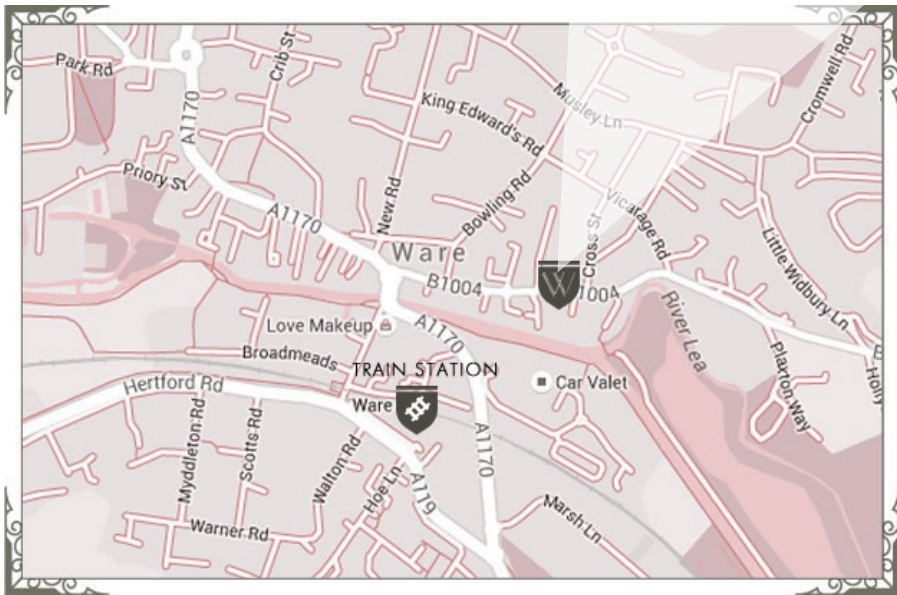

Invisalign is the perfect solution to crooked or misaligned teeth without having to wear traditional metal braces. Known as invisible orthodontics, this type of treatment offers you the choice of wearing a clear and removable appliance while straightening and aligning your teeth.

This is a great option for adults who would not feel comfortable wearing metal braces for months on end. The technology behind invisible orthodontics is highly advanced and often gives patients a much shorter treatment time, depending on their individual cases.

Benefits of this type of treatment include having teeth straightened in a generally shorter period of time, straighter teeth and alignment of your top and bottom jaws. You can also enjoy the flexibility of your braces being hidden from an untrained eye, making you feel less self-conscious when socialising or speaking in public. With removable devices you can also take them out to eat or for special occasions, so they fit around your lifestyle.
